Language Definition (LL(1) Grammar) for Parser Construction in A4. This is the LL(1) version of the grammar on page 123 of Basics of Compilers.

1 0	*
1. Program	$\rightarrow FunctionList$
$2.\ Function List$	$\rightarrow Function \ Function ListCollection$
$3.\ Function List Collection$	$\rightarrow FunctionList$
$4.\ Function List Collection$	$ ightarrow \epsilon$
5. Function	$\rightarrow TypeID \ (\ TypeIDList \) = Expression$
$6.\ TypeID$	$\rightarrow int \ \mathbf{id}$
$7.\ TypeID$	$\rightarrow bool$ id
$8.\ Type IDL is t$	$\rightarrow TypeID\ TypeIDListCollection$
$9.\ Type IDL ist Collection$	ightarrow , $TypeIDList$
$10.\ Type IDList Collection$	$ ightarrow \epsilon$
11. Expression	ightarrow if Comparison then Value else Value
12. Expression	$\rightarrow let \ \mathbf{id} = Value \ in \ Expression$
13. Expression	$\rightarrow Value\ ExtraExpression$
$14.\ Extra Expression$	ightarrow Arithmetic
$15.\ Extra Expression$	$ ightarrow \epsilon$
16. Arithmetic	$\rightarrow + Value$
17. Arithmetic	$\rightarrow -Value$
18. Comparison	$\rightarrow Value\ Comparison Right$
$19.\ Comparison Right$	$\rightarrow == Value$
$20.\ Comparison Right$	$\rightarrow ! = Value$
$21.\ Comparison Right$	$\rightarrow > Value$
$22.\ Comparison Right$	\rightarrow >= $Value$
23. Value	ightarrow number
$24.\ Value$	$ ightarrow \mathbf{id}\ ValueParameters$
$25.\ Value Parameters$	$\rightarrow (Parameters)$
$26.\ Value Parameters$	$ ightarrow \epsilon$
27. Parameters	$\rightarrow Value\ ParametersList$
$28.\ Parameters List$	\rightarrow , $Parameters$

 $\rightarrow \epsilon$

 $29.\ Parameters List$
